Michael & Barla,

The Board has raised the red flag of a possible defect in applicant's declaration or affidavit. Applicant has substantially reiterated an explanation presented by the examiner to the Board after the first remand. That explanation detailing why the documents were not inconsistent per se did not satisfy the Board. While it is certainly plausible that the other remaining inventors on the declaration are the inventors of the remaining claims and hence would refute there being an inconsistency in the documents, it is also possible that an inventor may have been omitted or improperly included on these documents. It is necessary to see the identity of the remaining inventors to definitively evaluate that issue.

As the examiner lacks the same level of omniscience as the Board, and there may have surfaced contrary evidence which the Board may posses from other cases that is relevant to the issue presented. Such evidence may be adverse to applicant's documents, so there is a need to evaluate those documents in question subsequent to the examiner's earlier evaluation.

While applicant has properly pointed out the examiner previously evaluated the affidavit, in view of the suspicions raised by the Board, it is necessary to scrutinize the declaration and affidavit further in view of the red flag raised by the Board.

In order to properly evaluate whether the Board's suspicion of such a defect is fatal to either document, it is necessary to find the identity of the inventor of each claim.

If applicant has not submitted a proper declaration, applicant should execute a new declaration. If the proper inventorship does not support applicant's priority chain, applicant should amend his priority claim. If applicant has omitted an inventor from his affidavit or included an incorrect inventor on his affidavit, he should withdraw the current affidavit.

GÉNEÓ. CRAWFORD SUPERVISORY PADENT EXAMINER
